

Ontario Glass & Metal Association invites you to attend its upcoming

## 2023 SPRING SEMINAR

# First-Surface Bird-Friendly Requirements as per Toronto Green Standard, Version 4

Thursday, May 18, 2023

Richmond Hill Country Club

Cost: \$61.95 for Members (+HST), lunch included

\$88.50 for Non-members (+HST), lunch included

The Toronto Green Standard Version 4 has completely changed the way we can apply bird-friendly markings to glazing. This seminar brings together two influential people who consulted on the Toronto Green Standard, Version 4, and who helped write the CSA standard for bird-friendly design it is based on.

### SPEAKERS:

**Michael Mesure, Executive Director, Fatal Light Awareness Program Canada.** A founding member of FLAP Canada, Michael has been with the organization since it began operations in 1993. An author and speaker, Michael regularly delivers presentations on the topic of bird-building collisions, bringing attention to the reflective light issue that impacts over one billion birds across North America every year. His work increasingly focuses on solutions to help mitigate and remediate the challenges of bird migrations in built environments, having led the BirdSafe® Building Standards and risk assessments, to helping develop the Canadian Standards Association's (CSA) Bird-Friendly Design standard as a technical committee member. Michael tirelessly advocates for bird protections at various levels of government, as well as consults with city planners across North America on developing bird-friendly guidelines and standards.

In addition to his ongoing bird rescue and recovery patrols, Michael's time is spent partnership-building and enabling collaboration to promote bird conservation programs and other renowned initiatives—including Global Bird Rescue and Bird-Safe Campus—and contributing content to ornithological-focused papers such as Collision Course: The Hazards of Lighted Structures & Windows to Migratory Birds and Window Collisions by Migratory Bird Species: Urban Geographical Patterns and Habitat Associations.

**Mauro Carreño, Associate, Senior Architect, BDP Quadrangle.** Mauro is an Architect with extensive experience in all stages of design and construction documents, management, coordination, and construction contract administration for multiple building typologies and scales. He has been involved in numerous acclaimed projects, including three Governor General's Medals in Architecture, and numerous winners of OAA awards and Canadian Architects Awards of Excellence.

Mauro has a strong interest in sustainable architecture, building materials, and construction. He is a LEED-accredited professional and has worked on multiple LEED projects including residential, academic, and institutional projects. He served as a Seasonal Lecturer at the John H. Daniels Faculty of Architecture, Landscape, and Design teaching the ARC 2024HS: Building Science, Materials and Construction 2 course, at a Master of Architecture level.

Since 2016, Mauro has been collaborating with the City of Toronto as an adviser on the Toronto Green Building Standard in the form of consultation, early review and comment, and refinement.

**WHY YOU SHOULD BE THERE:** The bird-friendly regulations have dramatically changed in the Toronto Green Standard Version 4. By attending this seminar, you will gain knowledge of what is currently required and a sneak peek into where the codes are going. The OGMA is putting on this event so that glazing contractors don't make a very costly mistake by not following the new guidelines. What you don't know can hurt you!
